ICOS National Network Switzerland

Application for permission to work at the ICOS Class 1 Ecosystem station Davos

1. Principal investigator or project leader

Name Profession and academic title Year of birth

2. Institution responsible for the scientific project

Name

Mailing or street address

Phone number Fax E-mail contact person Website (URL)

3. Title of project

4. Duration of project

Start date

End date

5. Subject of research

Scientific objectives

Method

Expected results

Networking with other projects

6. Working requirements at the station

Area needed in m ²	inside:	outside:		
Electricity	volt			
Estimated total power consumption:				
Will you work or install instruments at the tower?			Yes	No
Will you use any potentially harmful chemicals or			Yes	No
dangerous goods?	If yes, please specify			
What kind support will you need?				

Other special requirements:

7. Installations and equipment to be used at the station

Please list and describe all instruments, auxilliary equipment, and tools that you plan to bring with you and use on site. Include dimensions, weights and power supply needs (i.e. voltage and power or current) of each individual device or installation and attach a rough sketch of the installation.

Will you need to import equipment from outside Switzerland?

No

8. Field work and impact on the environment

Provide a description of the field work such as sampling, measurements etc.

Describe the impact of the field work on the environment. Will your measurements interfere with the understorey vegetation / overstorey vegetation and how?

Will your experiment produce noise or emissions of any other kind? If yes, please specify.

9. Participants

Please list the name, profession, address, and e-mail address (if not the same as above) for each participant who will work on the project at the Davos station.

10. Conditions of agreement and signature

If my planned research includes work or installations at the tower of the Davos station, I confirm that I follow the respective safety regulations for working at the site and of my employer. Before I start any work at the tower, I will contact Philip Meier (ETH Zurich, philip.meier@usys.ethz.ch) and Christoph Hüglin (Empa, Christoph.Hueglin@empa.ch) for further details.

Further, I agree that the information on this application form can be published on the ICOS Switzerland website and in hard copy.

Please sign i) by inserting an digital image of your signature or ii) by hand and scan the document afterwards. Do NOT use the Sign Function in Adobe Acrobat, because this will lock the document.
